

El Monte Middle School

Home of the Mighty LOBOS!

BRINGING OUT THE BEST

IN THIS ISSUE

Principal's Note

It was another exciting week at El Monte Middle School. On Tuesday night, we had the opportunity to welcome incoming 6th graders and their parents at our Elective Expo. Students were able to provide input on their elective of choice.

essential standards and immediate feedback. Students are now accustomed to the criteria for lunch intervention, having a D or F in ELA and/or Mathematics. We will continue to do our embedded intervention with the data collected from formative assessments. We have had success with learning logs being used to drive the discussions during PLCs. This allows students to have immediate intervention aligned to standards. Thank you teachers for having a focused lens. We look forward to sharing this information with parents at conferences on March 28th.

-Marlena

As we countdown to CAASPP, we have 19 days before our ELA testing begins. Thank you teachers for using these last few weeks to focus in on the

"TELL ME AND I FORGET,
TEACH ME AND I MAY REMEMBER,
INVOLVE ME AND I LEARN."

~ BENJAMIN FRANKLIN

On Tuesday night, students and parents were able to attend an informative REAP presentation that gave them important information regarding this wonderful resource. Parents received the ins and outs of the program and were very excited to sign their students up.

REAP

is

a non-profit foundation established to support education in rural communities. REAP focuses on activities that directly improve the quality of education and raise the academic bar for rural students in agricultural communities, and aims to support students who have demonstrated the ability and drive to become leaders in their communities.

-Mario

This week in 6th grade we have lived and taught by this quote. Students learned about the different forms of energy through sketch notes, TPR (total physical response), and hands on exploration.

Providing lessons and activities where students could build vocabulary and background knowledge is a wonderful way to prepare them for rigorous tasks and build their confidence. Students were highly engaged and used academic vocabulary to describe and justify forms of energy observed which allows them to be better prepared when applying the concepts in upcoming lessons.

We look forward to seeing the progress in our students as the unit continues.

-Lindsay

#weareLOBOS!

In sports news, our baseball team lost a close one to Hanford-Hardwick this week with a score of 1-6.

Our softball team also lost a close one to Hardwick 9-15. Our teams will continue their hard work next Wednesday when they take on Riverdale. Our track team also competed in our first ever school track meet. Come join us next week when we will host our first track meet at OHS. It is an exciting time to be a student athlete at El Monte!
